- RS-232 Serial Expansion
- DB9 Serial Interface
- For MDT880
- Wired Serial Connectivity

The MOD-RS232-01 is an optional RS-232 serial expansion module for the MDT880. It adds a classic DB9 serial interface for connecting external equipment that still relies on serial communication.

It is well suited to industrial integrations, legacy peripherals and vehicle systems where dependable wired serial connectivity is required.

Compatible with: Topicon MDT880, Topicon MDT865, Topicon MDT1065
